provocative essays on international trade with particular focus on u s foreign trade policy in the wind of the hundred days a new collection of public policy essays jagdish bhagwati applies his characteristic wit and accessible style to the subject of globalization notably he argues that the true clinton scandal lay in the administration s mismanagement of globalization resulting in the paradox of immense domestic policy success combined with dramatic failure on the external front bhagwati assigns the bulk of the blame for the east asian financial and economic crisis a disaster that prompts him to use as his title the poet octavio paz s image of devastation i met the wind of the hundred days to the administration s hasty push for financial liberalization in the region the administration bhagwati claims has also mishandled the freeing of trade the administration hosted wto meeting in seattle ended in chaos and the launch of a new round of multilateral trade negotiations was dashed bhagwati shows how the administration s failure to get congress to renew fast track authority can be attributed to an unimaginative response to the demands of a growing civil society in several essays he shows how free trade and social agendas both could have been pursued successfully if the concerns of human rights environmental cultural and labor activists had been met through creative programs at appropriate international agencies such as the international labour organization instead of the wto and via trade treaties bhagwati also criticizes the claim that globalization needs a human face arguing that it already has one he faults the administration for embracing unsubstantiated anti globalization rhetoric that has made its own preferred option of pursuing globalization that much more difficult

who could forget the searing images and heartfelt emotions stirred up by 2005's Live 8 benefit. The message was simple: let's make poverty history. Hundreds of thousands of well-meaning people from all over North America and Europe responded with an outpouring of donations. It was a remarkable display of compassion. Heads of state who assembled at the most recent G8 conference posed in front of the cameras to proclaim the West's determination to eliminate poverty in Africa. Leaders of the richest countries in the world agreed that it was incumbent upon them to come to the aid of the poorest countries in the world. But as Giles Bolton makes so heartbreakingly clear in this compelling and at times angry manifesto, virtually nothing has changed. Drawing on his experience at ground zero of the international humanitarian aid movement, Bolton provides a simple, succinct but comprehensive guide to the complex reality of the aid industry in Africa: what really happens to your aid money, where does the money go, how do globalization and trade regulations exacerbate the problem, how do government agencies waste and squander your money. In part, the memoir of a dedicated idealistic aid worker and in part a frustrated and angry jeremiad of a jaded political bureaucrat, Giles Bolton's story is a clarion call to everyone in the West to wise up to the reality of international aid and a passionate and heartfelt plea to effect change and real relief before it is too late.
