the volume includes a set of selected papers extended and revised from the i2009 pacific asia conference on knowledge engineering and software engineering keso 2009 was held on december 19 20 2009 shenzhen china volume 2 is to provide a forum for researchers educators engineers and government officials involved in the general areas of knowledge engineering and communication technology to disseminate their latest research results and exchange views on the future research directions of these fields 135 high quality papers are included in the volume each paper has been peer reviewed by at least 2 program committee members and selected by the volume editor prof yanwen wu on behalf of the this volume we would like to express our sincere appreciation to all of authors and referees for their efforts reviewing the papers hoping you can find lots of profound research ideas and results on the related fields of knowledge engineering and communication technology

this book constitutes the proceedings of the 27th international working conference on requirements engineering foundation for software quality refsq 2021 which was due to be held in essen germany in april 2021 due to the covid 19 pandemic the conference was held virtually in april 2021 the special focus of this year s refsq 2021 conference are contributions emphasizing the importance of human values such as privacy and fairness when designing software intensive systems as well as the challenges that intelligent and autonomous systems pose due to the tight interplay with humans

this book focuses on defining the achievements of software engineering in the past decades and showcasing visions for the future it features a collection of articles by some of the most prominent researchers and technologists who have shaped the field barry boehm manfred broy patrick cousot erich gamma yuri gurevich tony hoare michael a jackson rustan leino david l parnas dieter rombach joseph sifakis niklaus wirth pamela zave and andreas zeller the contributed articles reflect the authors individual views on what constitutes the most important issues facing software development both research and technology oriented contributions are included the book provides at the same time a

record of a symposium held at eth zurich on the occasion of bertrand meyer s 60th birthday

this book identifies challenges and opportunities in the development and implementation of software that contain significant statistical content while emphasizing the relevance of using rigorous statistical and probabilistic techniques in software engineering contexts it presents opportunities for further research in the statistical sciences and their applications to software engineering it is intended to motivate and attract new researchers from statistics and the mathematical sciences to attack relevant and pressing problems in the software engineering setting it describes the big picture as this approach provides the context in which statistical methods must be developed the book s survey nature is directed at the mathematical sciences audience but software engineers should also find the statistical emphasis refreshing and stimulating it is hoped that the book will have the effect of seeding the field of statistical software engineering by its indication of opportunities where statistical thinking can help to increase understanding productivity and quality of software and software production
